

AIDA Cruises

AIDA Cruises selects Exterity to provide premium in-cabin infotainment system

AIDA Cruises is the market leader in the German-speaking cruise market and aims to create contemporary, resort-style facilities that appeal to today's active consumers – and that now includes a premium in-cabin digital user experience that fully engages this tech-savvy market. The company worked with the hospitality focused division of Exterity, to upgrade its in-cabin infotainment systems to exemplify the premium-quality amenities that make its ships into, in effect, seagoing resorts.

AIDA Cruises prides itself on providing facilities that create a modern and comfortable experience for all guests, from world-class sports and spa facilities to spacious cabins and suites. Yet in today's digital era, travellers also see technology as a key consideration in their choice of luxury cruise, which is a key reason why AIDA chose to deploy Exterity's ArtioGuest middleware to create a five-star in-cabin entertainment experience on a number of its cruise ships.

The challenge

AIDA wanted a solution that would combine guest access to international TV channels with interactive cruise services. As well as supplying a range of high-definition international content to each cabin, the system also needed to be flexible and easy to manage to meet the highest levels of service expected by guests onboard the ships. One of AIDA's primary motivations behind upgrading their technology was the desire to offer cutting-edge room infotainment services via SmartTVs, which was not possible with previous systems.

The solution

As of mid-2020, Exterity has equipped six AIDA ships – including AIDAnova which, at 183,900 tonnes and 5,200 passenger capacity, is among the world's largest and most technologically advanced vessels – with a combined total of over 11,000 guest and crew cabins, each with in-cabin infotainment TV interfaces powered by ArtioGuest. AIDA created a fully customisable interface that delivers a rich variety of German language and international TV channels, and movies (with age restriction controls) and TV shows on demand. Crew members also have the ability to catch up on the previous two days of TV, an important benefit for their welfare, as well as to watch training videos.

“Technology has become central to the overall onboard experience, providing guests with additional ease and convenience when accessing cruise ship services and television channels. After reviewing several vendors, it quickly became clear that the Exterity systems were the obvious choice. ArtioGuest has been widely deployed by world-renowned hospitality brands, which is testament to the reliability of the platform.”

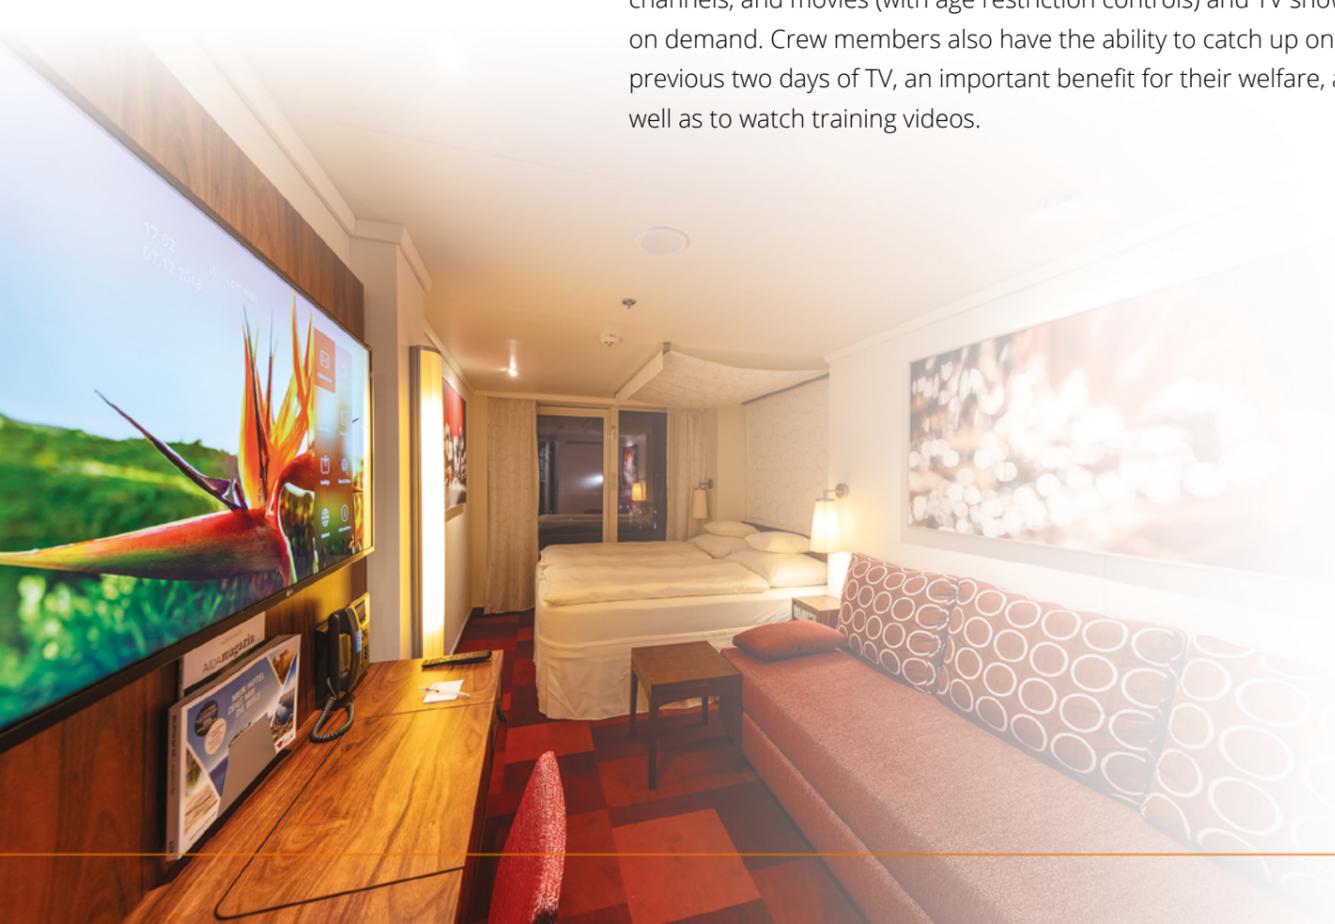

Chris Van Hoven, Senior Product Owner “Digital Onboard Experience” at AIDA Cruises

Additional channels, provided by Exterity Encoders and AvediaServer Play channels, include important safety information videos, live and delayed broadcasts of on-board theatre, entertainment previews, and interviews with the Captain. Live feeds from on-board webcams are also available showing the view from bow, stern and pool deck cameras. Destination and experience videos with promotional shopping information also provide additional revenue opportunities for AIDA.

Alongside providing guests with a premium entertainment experience, ArtioGuest enables AIDA to drive additional revenue as guests are able to book excursions and purchase movies from the comfort of their room. Guests can also view their bill and receive messages from ship personnel on their in-cabin TV.

In addition to in-cabin infotainment, the Exterity system also powers public screens in areas such as reception and lounges, with digital signage displaying news channels, weather, events, restaurant/bar opening times, as well as live sports events, all managed centrally by the system administrator. Safety measures are also taken into consideration with the ability to automatically mute all TVs when emergency signals and announcements are in progress.

Wir wünschen Ihnen
eine schöne Reise auf AIDAnova!

The result

Van Hoven is full of praise of the Exterity deployment and its technical staff, and the Exterity platform: "The Exterity team and technology exceeded our expectations. Each installation process has been seamless, and the team was always on hand to ensure everything was running smoothly. We're looking forward to working closely with them again in the future."

Exterity's Director of Accommodation, Eleuterio Fernandes, commented: "As with today's tech-savvy hotel guest, the discerning cruise passenger has an expectation of exceptional comfort and style, which extends to their in-cabin entertainment system and digital communications onboard their cruise. Exterity provides a variety of technology solutions that integrate seamlessly with the cruise line's own systems to ensure a premium, convenient experience."

About Exterity

Since 2001 Exterity has been designing, developing and manufacturing technically innovative products that deliver video over an IP network to some of the leading organisations across the globe. Our IPTV technology solution enable the distribution of TV, video and digital signage over enterprise IP networks to an unlimited number of end points, supporting large volumes of content and receiving devices without compromising system performance or availability.

In 2021, Exterity was acquired by VITEC, a worldwide leader in IP video streaming solutions. The move signals VITEC's intention to accelerate growth and strengthen its leadership position, with natural technology and customer synergies between the two companies that will enable VITEC to extend its reach into new geographies, market verticals and partners.
